

Products Coordinating Committee (PCC) Q1 2023 Meeting Agenda

DATE: Thursday, February 16, 2023
LOCATION: Webinar Only
TIME: 8:30am – 12:30pm
WEBINAR: Microsoft Teams – See details in calendar invite or [register here](#)

PCC OBJECTIVE + DESIRED OUTCOME: Collaboration on coordination and optimization of NEEA programs and related activities by (1) identifying and managing through potential implementation challenges between NEEA and local utility activities, and (2) identifying and seizing leveraging opportunities that can drive amplified market influence.

(All Times Pacific)	(R) Residential	(C) Commercial	(I) Industrial	Page #
8:30-8:40 (10 min)	Welcome, Agenda & Packet Review			Alisyn Maggiore All p. 1-4
8:40-10:00 (80 Min)	Introductions & Regional Roundtable <i>Committee members and NEEA program staff share program and organization updates, highlight areas of possible interest and coordination with others.</i> <u>Specific highlights to consider:</u> – 2023 Program goals and 2022 program outcomes <i>Desired Outcome: All are updated on each other’s activities and better understand what’s happening across the region.</i>			All --
(10 min)	BREAK			All
10:10-10:35 (25 min)	Housekeeping – Announcements (PCC Co-Chair Q2 Hybrid Mtg EFX) – 2023 PCC Annual Workplan & Slating “Priority 2” Topics			Alisyn Maggiore p. 5-8
10:35-11:00 (25 min)	<u>MOTOR-DRIVEN PRODUCTS REGIONAL PRIORITY TOPIC</u> Efficient Fans: Program Overview (C) (I) <ul style="list-style-type: none"> Level-set on NEEA’s focus areas for Program Development phase <i>Desired Outcome: Committee members and NEEA gain a shared understanding of what each other is working on related to Efficient Fans</i>			Tamara Anderson p. 9
(10 min)	BREAK			All
11:10-12:25 (75 min)	<u>WATER HEATING REGIONAL PRIORITY TOPIC</u> Understanding Low Adoption (R) <ul style="list-style-type: none"> Clarifying channels for install and role for midstream Rural availability (including equity play (DEI) for utilities) Cold climate <i>Desired Outcome: Level-set on how low adoption is being defined around the region. Committee members and NEEA staff understand which successful tools and tactics could help improve low adoption in the region.</i>			Emily Rosenbloom p. 10
12:25-12:30 (5 min)	Recap, Next Steps, Adjourn			Alisyn Maggiore --

Memorandum – Agenda Item (Tier 1)

February 9, 2023

TO: Products Coordinating Committee (PCC)

FROM: Alisyn Maggiora, Stakeholder Relations Manager

SUBJECT: Meeting Packet Agenda Items, Informational Updates and Additional Details

MEETING PACKET APPROACH

This packet continues the “tiered” approach:

- Tier-1 memos for active agenda items
- Tier-2 memos for informational updates on items not currently requiring agenda time
- Tier-3 materials provided as additional detail for those interested, accessible via links in the Tier-1 and Tier-2 memos. All other Tier 3 materials are listed below.

This approach helps keep packets concise and digestible. Any input for improvement is appreciated.

AGENDA ITEMS (Tier 1)

- Page 1: Agenda
- Page 2: Meeting Packet Informational Updates
- Page 3: Meeting Preparation Highlights
- Page 4: NEEA’s Product Groups & Coordinating Committee Structure
- Page 5: Memo: Q2 Hybrid Meeting Format
- Page 6-8: Memo: Priority 2 Topics for 2023 PCC Workplan
- Page 9: Memo: Regional Priority Topic – Efficient Fans Program Overview
- Page 10: Memo: Regional Priority Topic – Heat Pump Water Heaters “Addressing Low Adoption”

INFORMATIONAL UPDATES (Tier 2)

NEEA Program Activity Reports are provided in Q2 and Q4.

- Pages 11-12: Memo: Federal Funding Opportunities

ADDITIONAL DETAILS (Tier 3)

Committees: *(meeting notes include links to packets, slides, and recordings)*

- [Q3 2022 ISCC Meeting Notes](#)
- Q4 2022 PCC Meeting Notes - [Day 1](#), [Day 2](#)
- [Q3 2022 RPAC Meeting Notes](#) (no Q4 meeting)

Latest Newsletters, PCC Charter:

- Q4 2022 Newsletter – [Market Research and Evaluation](#)
- Q4 2022 Newsletter – [Codes, Standards and New Construction](#) (*Manufactured Homes update on p.22*)
- Q3 2022 Newsletter – [Emerging Technology](#)
- [Products Coordinating Committee \(PCC\) Charter](#)
- [2022 PCC Annual Workplan](#) (*2023 Workplan is on p.8 of this packet and will be posted to neea.org after Q1 meeting*)

PCC Q1 2023 – Meeting Topic Preparation Highlights

Preparation for All Committee Items:

- Review packet, including agenda, informational updates and all memos. See additional preparation for specific agenda items below.

➤ **ROUNDTABLE:**

Committee Members will share highlights from their work, programs and/or organization since the Q4 meeting.

Specific topics for Committee Members to consider highlighting include:

- **2023 Program goals and 2022 program outcomes**

➤ **Q2 HYBRID MEETING OPTION**

Review Tier 1 memo on p.5 and **come prepared to:**

- (1) Share whether you plan to attend the Q2 meeting (@ NEEA's office) in person or virtually;
- (2) Share any preference you may have about having a hybrid option for future meetings (virtual will always be available).

Please feel free to offer your input directly in advance, or after, if you prefer.

➤ **PCC ANNUAL WORKPLAN: SLATING PRIORITY 2 TOPICS**

Review Tier 1 memo on p.6 and **come prepared to:**

- (1) Offer suggestions and/or other considerations to help us align on a process for reviewing Priority 2 topics

Please feel free to offer your input directly in advance if you prefer.

➤ **REGIONAL PRIORITY TOPIC – Efficient Fans Program Overview**

This topic will take an “inform” approach.

Review Tier 1 memo on p.9 and **come prepared to:**

- (1) Learn about the newest program in NEEA's portfolio;
- (2) Better understand how key planned activities (market research, technical research, partnerships, and preparing for the first federal standard) may interact with and/or compliment your efforts in the Fans space;
- (3) Ask any clarifying questions you may have.

➤ **REGIONAL PRIORITY TOPIC – HPWH Understanding Low Adoption:**

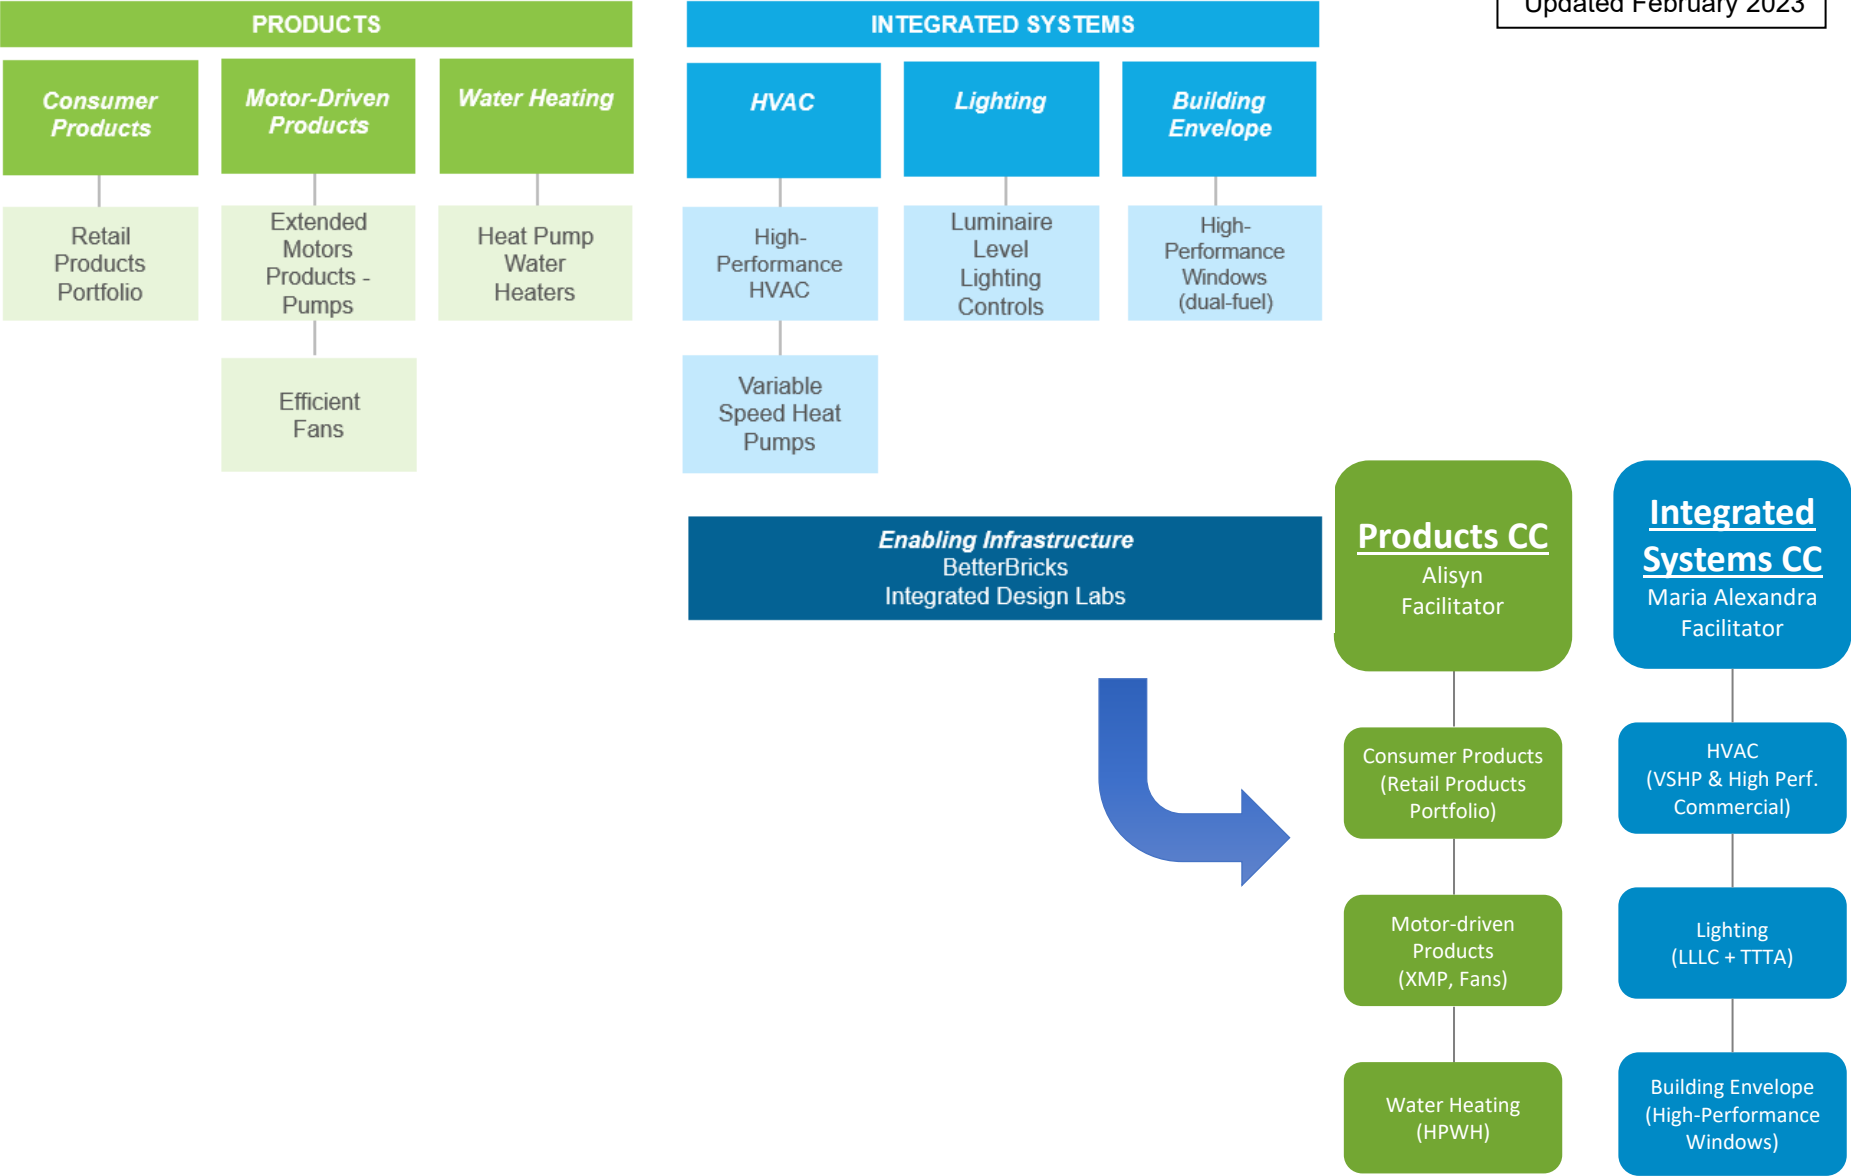

This topic will take a round-robin share-out and discussion approach.

Review Tier 1 memo on p.10 and **come prepared to:**

- (1) Learn about NEEA's focus areas for addressing low adoption across the region;
- (2) Share-out on the following:
 - How your organization defines low adoption with respect to the HPWH market; and,
 - Any successes/lessons learned from your program's efforts (i.e. *how have you penetrated this market thus far in your local territory?*);
- (3) Engage in group discussion about local and regional challenges and opportunities for continuing to address this market barrier.

NEEA's Product Groups and Coordinating Committees Structure

Updated February 2023

Memorandum – Agenda Item Tier 1

February 9, 2023

TO: Products Coordinating Committee (PCC)
FROM: Alisyn Maggiora, Stakeholder Relations Manager
SUBJECT: Q2 Hybrid Meeting Format: In-Person Option

Ask of You:

With regards to having in-person/hybrid or virtual meetings, please consider where you’re at personally, as well as any directives you may have organizationally, and come to our Q1 meeting ready to share whether you’ll be in attendance in person or virtual in Q2 and your preference for future meetings. Thank you!

Brief Overview:

NEEA is piloting a hybrid meeting option for all Q2 advisory committee meetings to gauge whether stakeholders would like to have an in-person option for these meetings going forward. We’ve certainly learned a lot over the past three years on how to run meetings effectively in an all-virtual setting, and we’ve enjoyed some more equitable experiences as a result (*recall the old days of remote folks just being a voice on the phone*). In addition, there have been cost savings related to travel and facilities. On the other hand, we also recognize that there’s appetite by some folks to return to in-person for these forums, to reclaim some of the interpersonal connection and ad-hoc conversations that can occur when we’re together in-person.

In preparation for this, NEEA staff are thinking through the odds and ends of how to make the hybrid experience as equitable and effective as possible for all participants, particularly from a technology standpoint. Now we are looking to gauge from you whether you plan to attend in person, and ultimately, any preference you may have for future meetings. Recall that Q1 and Q3 will have shorter half-day webinars/meetings, whereas Q2 and Q4 will have “all-day” in-person/hybrid meetings or two half-day webinars over two days.

Here’s a list of 2023 PCC meeting dates, as a reference:

2023 PCC MEETING DATES	
Q1	Thursday February 16
Q2	Tuesday June 6 & Wednesday June 7
Q3	Thursday, August 17
Q4	Wednesday Nov 15 & Thursday Nov 16

If you have any suggestions, questions and/or concerns, please feel free to contact me before or after the meeting at AMaggiora@neea.org. Thank you!

Memorandum – Agenda item

February 9, 2023

TO: Products Coordinating Committee (PCC)
 FROM: Alisyn Maggiora, Stakeholder Relations Manager
 SUBJECT: Confirming Process for Priority 2 Topics for 2023 PCC Workplan

Our Ask of You:

- Please **review this memo and the 2023 PCC workplan, including list of Priority 2 topics** (see table below and workplan on p. 8) and
- **Come to the February 16 PCC meeting with any suggestions and/or other considerations to help us align on a process** for reviewing Priority 2 topics
- Please feel free to offer your input directly in advance if you prefer. Thank you!

Proposal for Reviewing Priority 2 Topics:

As you can see from our 2023 PCC Workplan on the last page of this memo, we’ve:

- ✓ Created a standing agenda item of 30 min at each quarterly meeting, to review Priority 2 topics.
- ✓ Listed all the Priority 2 topics that have come up during the Annual Planning sessions, in the ranked order as per survey results.
- ✓ Selected the first Priority 2 topics from each product group, along with the folks that noted interest/high value in each of these topics, and suggested the quarter for the Committee to review/discuss; see table below.

Product Group & Program	Priority 2 Topics	Stakeholders Interested in Topic	Suggested Quarter to Review
WATER HEATING: Heat Pump Water Heaters (HPWH)	<u>Topic G: Support for DIY to help with first cost, other barriers</u>	Possibly NorthWestern, Idaho, Chelan, Energy Trust, Seattle City Light	Q2 or Q3
CONSUMER PRODUCTS: Retail Products Portfolio (RPP)	<u>Topic A: Online sales (including search and selection process, role for utilities/attribution)</u>	Dave Murphy, BPA Will Dixon, PSE Possibly Pacific Power, Energy Trust, Idaho Power	Q2 or Q3
MOTOR-DRIVEN PRODUCTS: XMP Pumps & Circulators	<u>Topic A: Elevator pitch cont’d (for explaining tech to specifier / engineer - how it's different, what to look for)</u>	Whitney, NWE Possibly PSE, Seattle City Light	Q3 or Q4
MOTOR-DRIVEN PRODUCTS: Efficient Fans	<u>Topic B: Fan systems (including design, selection, and application, and the associated impacts to efficiency / savings)</u>	Chao Chen, PSE Possibly NorthWestern, Seattle City Light, Tacoma, Clark, NWPC	Q4 if time

Here’s what we’re proposing going forward to address these topics:

- We’ll circle back with Committee Members and NEEA’s program management staff to:
 - Confirm the folks are still interested and willing to lead these topics

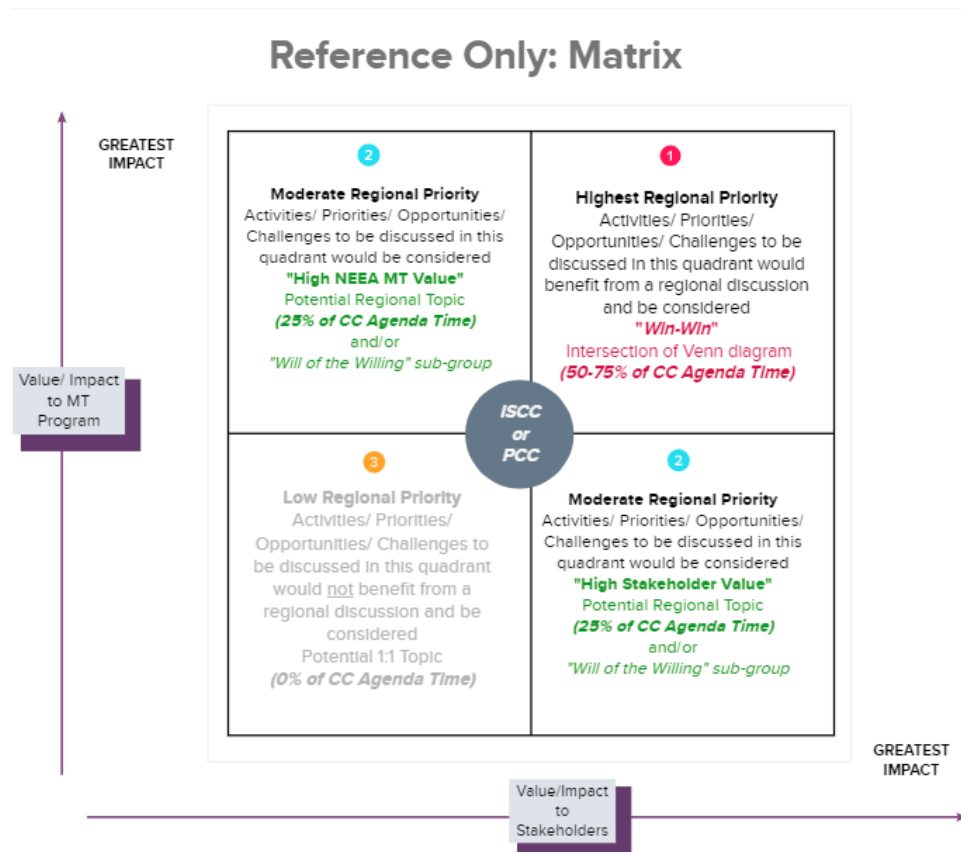

- If no one is interested, then topic will be dropped from the Priority 2 list and the next topic on that product group list will be selected for discussion
- Confirm the best quarter to slot these topics, based on when folks are available and the committee audience that will already be covering a Priority 1 topic
- Note: The topic lead(s) would be asked to include a short memo in the relevant meeting packet to prep the Committee for a 15-30min discussion; memo would include the *what, why and who*:
 - *What is the discussion to be had? Why? Who would be impacted/ be necessary for the discussion?*

What do you all think? Is it clear? Is there anything missing? We look forward to hearing your thoughts and suggestions and aligning on this piece of the process.

FYI only - Refresher: Priority 1 & 2 Topics:

Priority 1 topics have greatest regional interest for further discussion this year and make up about 75% of the agenda.

Priority 2 topics have moderate regional interest for discussion and fill in the last 25% of the agenda; see matrix below.

Should you have any questions on this or if you think it'd be helpful to connect before our meeting, please reach out at AMaggiora@neea.org. Many thanks, all!

						Efficient Fans (no priority 1) 1) TOPIC A: Program Overview (including knowns and unknowns as NEEA program develops, and how utilities might plug in down the road) 2) TOPIC B: Fan systems (including design, selection, and application, and the associated impacts to efficiency / savings)	

Memorandum – Agenda Item (Tier 1)

February 9, 2023

TO: Products Coordinating Committee
FROM: Tamara Anderson, Program Manager
SUBJECT: Efficient Fans Program Overview

.....

Our Ask of You:

Please come prepared to learn about the newest program in NEEA’s portfolio, the Efficient Fans program, which was approved unanimously by NEEA’s Regional Portfolio Advisory Committee (RPAC) in Q3 of 2022. This is the first year of the program development phase, so it’s expected to have more questions than answers. As a result, there are limited activities on which to coordinate at this time. The purpose of this conversation is to gain a shared understanding of what utilities and NEEA are working on related to Efficient Fans.

Brief Overview:

This program focuses on fan systems which can include a fan, motor, and drive (including controls). The Efficient Fans program includes non-embedded, or stand-alone fans that are not packaged as part of any equipment with additional operating functions (e.g., HVAC, Make-up Air or Outdoor-Air units) by the manufacturer.

The Efficient Fans program will initially focus on partnering with manufacturers who: (a) are certified by the Air Movement and Controls Association, Inc. (AMCA); (b) include Fan Energy Index (FEI) in their fan selection software, and (c) are represented in the Northwest. The program will initially focus on efficient fans within the commercial and industrial sectors.

The program will develop an incentive strategy designed to highlight Fan Energy Index (FEI) in manufacturers’ fan selection software, to promote the sale of more efficient fans and allow us to collect and assess data for energy efficient fans and/or fan systems. The program overview will discuss key activities for program development over the next two years including planned market research, technical research, partnering with AMCA, and preparing for the first federal standard for fans expected later this year.

If you’re interested in a follow up discussion one-on-one, or if you have questions about this memo, please contact Tamara Anderson via tanderson@neea.org.

PROGRAM LIFECYCLE STATUS

Memorandum – Agenda Item (Tier 1)

February 9, 2023

TO: Products Coordinating Committee
FROM: Emily Rosenbloom, Senior Program Manager HPWH
SUBJECT: HPWH Regional Priority Topic - Understanding Low Adoption

Our Ask of You:

Come ready to share:

1. How your organization defines low adoption with respect to the HPWH market, and,
2. Any successes/lessons learned from your program’s efforts (i.e. how have you penetrated this market thus far in your local territory?)

Brief Overview:

Understanding and addressing low adoption of HPWHs is a critical element of NEEA’s market transformation effort. NEEA will provide an overview of how it’s defined low adoption for the regional program and share how and why we believe installers are the key link to addressing remaining low adoption. This will include an overview of current and 2023 planned program activities targeting installer adoption.

Once NEEA staff sets the stage, we’d like to hear from each of you (or your organizational peers running the programs) on the prompts above; we will also hear from a few of the local programs who can highlight aspects of this work around cold climate, regional coordination, and potentially, energy equity/DEI.

As part of NEEA’s share-out, we will discuss our plans to offer a “train the trainer” event later this year to help increase the pool of Hot Water Solutions HPWH trainings and ultimately, get more installers educated and trained around the region. If participation in this event interests you, please contact me.

Please contact [Emily Rosenbloom](mailto:ERosenbloom@neea.org) at ERosenbloom@neea.org if you have questions about this memo.

HPWH PROGRAM LIFECYCLE STATUS

Memorandum – *Informational*

January 25, 2023

TO: Natural Gas Advisory Committee (NGAC)
FROM: Jonathan Belais, Policy Manager, NEEA Staff
SUBJECT: Federal Opportunity Coordination

Our Ask of You:

Please review the memo and bring any questions, recommendations, feedback, or concerns to the Q1 NGAC meeting on February 1, 2023, or contact me at the email below.

Context

The passage of the Infrastructure Investment and Jobs Act (IIJA, 2021) (IIJA), also known as the Bipartisan Infrastructure Law (BIL), and the Inflation Reduction Act (IRA, 2022) has meant a dramatic increase in federal activity and the emergence of a variety of new opportunities for energy efficiency stakeholders. NEEA staff are closely tracking these opportunities and working to incorporate them into market transformation strategies, where appropriate. As state agencies are the primary conduit for much of the increased energy efficiency funding, NEEA will continue to work closely with each state to best leverage these new resources and NEEA’s expertise to support the regional adoption of efficient products and practices.

NEEA staff have received several requests from utility staff interested in potential regional coordination efforts. Staff strongly suggest that interested committee members coordinate with their state energy offices to identify the best avenues of engagement. Additionally, your states may offer consolidated information regarding recent or upcoming federal opportunities (see [Idaho’s tracker](#) of federal funding opportunities or [Oregon’s blog](#) on bringing federal funds to Oregon). Federal Request for Information (RFIs) are a good way to provide direct feedback to the relevant federal implementation teams, but coordination locally will be critical as the needs and plans of individual states will vary greatly.

NEEA’s Role

NEEA staff are aware of the scale of this collective opportunity and will continue to identify ways NEEA can help to maximize the impact for the region. Due to the structure of the new and expanded programs outlined in IIJA/BIL and IRA, it is unlikely NEEA will be a direct recipient for most programs. Instead, NEEA will continue to work with funders, market actors, and other stakeholders to adapt to and prepare for the shifting political landscape. Resulting shifts in market strategies and program activities will continue to flow through coordinating committees (electric) and NGAC (gas) to help align with local programs. NEEA staff are connecting regularly with the region’s state energy offices to support coordination and identify connections to NEEA’s work. As more concrete opportunities for engagement develop, NEEA may serve as a regional convener for discussions regarding upcoming opportunities.

Timing

The timeframe for these opportunities and associated activities is uncertain. As federal agencies have grappled with the exponential increase in new program and staffing needs, the development and release of information and new federal program funding has been markedly slow. It is also important to

remember that many of these resources, including the \$9 billion in new residential efficiency rebates, will be dependent upon proposals and timing from state agencies and may have multiple application windows over the coming years. While a few opportunities are already live, expectations are that the first half of 2023 will see a bevy of new Requests for Information (RFIs), leading to a similar number of Federal Opportunity Announcements (FOAs) in the second half of the year. NEEA staff are monitoring previous and existing RFIs and FOAs and will continue to track upcoming opportunities as they are released. Just to highlight a few high-profile efficiency programs:

1. [Live] [Industrial Efficiency and Decarbonization](#) – Full Applications due 1/4/23
2. [Live] [Resilient and Efficient Codes Implementation](#) – Concept Papers due 1/27/23
3. [Live] [Renew America’s School Grant](#) – Available until expended
4. [Home Energy Rebate Programs](#) (High-efficiency Electric Home Rebate Program and Whole Home Energy Reduction Rebate) – RFI responses due March 3, FOA in late 2023

Please contact NEEA’s Policy Manager, Jonathan Belais (jbelais@neea.org), with any questions.
